

1. Discover

▼ Top page <http://aiu.summon.serialssolutions.com/>

Enter search term(s) into the search box

Summon is a web-scale discovery service and uncovers content across your library's collections; from your library's catalog to your full text databases; from online video and audio, to your abstracting and indexing content.

As you type within the search box, the Summon autocomplete algorithm offers searches that might be similar to the one you're typing. This feature reduces the number of keystrokes needed by predicting search queries in real-time, as well as expanding a search query by suggesting search terms that will help increase the precision of your search.

Summon discovers contents from one search box!

Britannica

Summon retrieves reference content from Encyclopedia Britannica if the library has a subscription.

Related Topics

Summon shows relevant topics that may be of interest to the user.

2. Find the article from the search results

A Search Result page

A Narrow a Search Results -Facets-

Facets are filters that can be applied to narrow the result sets, allowing quick identification of the items most likely to benefit the patron's research goals.

B Sorting Search Results

Clicking at the top of the results set provides options to sort by Relevance, Date (newest to oldest) and Date (oldest to newest).

C Content Spotlighting

The Content Spotlighting feature highlights particular content types.

D Document title

Title of journal, books, article or others.

E Reference Information

Volume, issue, page, author, ISSN/ISBN or others.

F Bibliographic Record Fields

When full text is available in your library's collection, a patron sees the "Full Text Online". A direct link into the library's OPAC with bibliographic numbers displays to items that exist in full text at your library.

G Preview Item

Clicking on the "Preview" link at the bottom of a record will generate display of the preview information below the record.

H Altmetrics

Altmetric badges (📊) display information about an article's scholarly impact. "See more details" link which details such as the actual tweets, blog posts and news stories.

I Select Format and Display Citation

📄 — Select a citation format and print it
 ✉️ — Select a citation format and email it
 📁 — Save item to the folder

J Saving Items

Saved items folder (📁) will be available for the duration of your search session. You can view, copy/paste, email, print or export your list to bibliographic management software.

To filter your search results in multiple ways when you click on the "Edit Facets" button at the top of the facets pane:
